

Dr. Sharmishtha Patra FRCOG

Gynecologist, Obstetrician &
Laparoscopic Surgeon

Advantages of Total Laparoscopic Hysterectomy (TLH)

Minimally Invasive: Smaller incisions result in less trauma and scarring.

Shorter Hospital Stay: Most patients are discharged within 24 hours.

Faster Recovery: Patients can return to daily activities within 2-4 weeks.

Reduced Pain: Compared to open abdominal hysterectomy, TLH causes less postoperative pain.

Lower Risk of Infection: Smaller incisions lower the chances of infection.

Advantages of Total Laparoscopic Hysterectomy (TLH)

Total Laparoscopic Hysterectomy is a modern, minimally invasive approach to uterus removal.

Key benefits:

- ❖ Smaller incisions with less trauma and scarring
- ❖ Reduced postoperative pain
- ❖ Lower risk of infection
- ❖ Shorter hospital stay (typically within 24 hours)
- ❖ Faster recovery, with return to daily activities in 2-4 weeks.
